PROFILE SUMMARY

I am a 3rd-semester Informatics Engineering student with hands-on experience in full-stack web development and a solid background in competitive programming. Interested in applying strong problem-solving skills to Artificial Intelligence and Machine Learning, with the aspiration to grow as an AI Engineer. Enjoys building real-world applications and continuously learning new tools and technologies.

EDUCATION

Universitas Sriwijaya – Palembang, Indonesia
Informatics Engineering | Current GPA: 3.95 / 4.00 | 2025 – Present

- Active in tech-focused student organizations, contributing to campus initiatives and peer collaborative projects.
- Competed in competitive programming contests and software development competitions to solve high-complexity algorithmic challenges.
- Independently learning full-stack technologies and foundational AI Engineering principles alongside academic coursework.

SMA Negeri 1 Jejawi – Ogan Komering Ilir, Indonesia
Mathematics and Science | 2022 – 2025

- Recognized as the highest-performing academic student in school history, verified by official data from SIMT (Sistem Informasi Manajemen Talenta – Puspresnas).
- Represented the school in the National Olympiad in Informatics (OSN Informatika), mastering advanced algorithms, dynamic programming, and data structures.
- Competed in multiple regional and national Mathematics and Competitive Programming competitions.

EXPERIENCE

Himpunan Mahasiswa Informatika – Universitas Sriwijaya
Academic Division Staff – Information Technology Development | 2026 – 2027

- Applied modern full-stack development skills that support organizational needs.
- Served as the Curriculum Division Coordinator for the 2026 IT Freshmen Programming Training, designing and overseeing the delivery of foundational programming modules for new students.

Sriwijaya Informatics Exhibition
Web Developer | 2026

- Engineered the secure authentication module and integrated smooth UI animations to elevate the overall user experience.
- Developed, scaled, and updated cross-functional features and dynamic content across multiple web pages to meet shifting requirements.
- Resolved complex layout bugs and cross-device responsiveness issues, ensuring seamless platform performance on all screen sizes.

SMAN 1 Jejawi Olympiad Team
Core Member | 2023 – 2024

- Authored and distributed study modules and practice test sets to elevate team readiness for the National Science Olympiad (OSN).
- Led peer-mentoring sessions on basic algorithms, logic building, and competitive programming fundamentals.
- Represented the school at the regency and provincial levels, competing against top-tier schools in high-level Informatics problem-solving contests.

HONORS AND AWARDS

- 2025 – [National Level] Runner Up at Competitive Programming SRIFOTON, **Sriwijaya University**
- 2025 – [Departmental Level] 3rd Place Winner at Code League Informatics Engineering UNSRI, **HMIF UNSRI**
- 2024 – [Provincial Level] 7th Place Winner at OSN-P Informatika, **BPTI - Puspresnas Kemendikbudristek**
- 2024 – [Regency Level] 2nd Place Winner at OSN-K Informatika, **BPTI - Puspresnas Kemendikbudristek**
- 2024 – [National Level] Top 25 at Competitive Programming SRIFOTON, **Sriwijaya University**
- 2024 – [National Level] Top 54 / 172 at Bina Nusantara Programming Contest for High School, **SoCS Binus University**
- 2023 – [Regency Level] 2nd Place Winner at OSN-K Informatika, **BPTI - Puspresnas Kemendikbudristek**

SKILLS

- **Languages:** C, C++, Java, Python, TypeScript, JavaScript (ES6+), SQL, HTML5/CSS3.
- **Frameworks & Libraries:** React.js, Next.js, Tailwind CSS.
- **Databases & Infrastructure:** PostgreSQL, MySQL, Supabase (Auth, RLS, Storage).
- **Tools & Platforms:** Git, GitHub, Vite, Figma, Vercel, Netlify, Cloudflare Pages, npm/Yarn.
- **Core Software Engineering:** Object-Oriented Programming (Encapsulation, Inheritance, Polymorphism, Abstraction), System Design Fundamentals.
- **Data Structures:** Stack, Queue, Linked List, Segment Tree, Fenwick Tree.
- **Algorithms & Problem Solving:** Brute Force, Divide & Conquer, Greedy, Dynamic Programming (Standard & DP on Tree), Graph Algorithms (DFS/BFS, Dijkstra, Bellman-Ford, Floyd-Warshall, Prim/Kruskal), Tree Traversals & Properties.
- **Soft Skills:** Analytical & Critical Thinking, Complex Problem Solving, Effective English Communication, Continuous Learning, Autonomous Execution & Delivery.
